

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Office of T. F. Allen, M.D., 10 East 36th Street,

New York, November 14th, 1882.

I have carefully examined the repertory of Dr. Wm. A. Allen, of Flushing, and assure you that it is exceedingly valuable. It should be printed in pocket form. I should use it constantly.

Dr. Allen has a large experience in the treatment of intermittents, and his own observations are entitled to great respect.

Very Truly Yours,

T. F. ALLEN.

PREFACE.

THE treatment of intermittent fever is a subject in which I have long been interested and to which I have given much attention, and for two reasons: because I have had many cases under my professional care during the past thirteen years; and since it has so often been asserted by physicians and laymen that homœopathic treatment is totally unable to suppress the paroxysms, to remove the pathological conditions and symptoms incident to them—to cure. It may be asserted with absolute certainty, that these things can be done without any exception, and that to succeed, it is only necessary to administer a remedy of proper potency selected in accordance with the law of similia, having in its choice a regard for the totality of symptoms.

The selection of the drug is often a very easy thing to accomplish, especially so if, as is often the case, we find cases of a season like each other even in detail. Under these circumstances, the careful consideration of a few cases serves to good and lasting purpose. Sometimes, however, the choice of the remedy demands more labor.

This repertory was not written with a view to its publication, but as an aid to myself in studying up intermittents. The Homœopathic Therapeutics of Intermittent Fever, by Dr. H. C. Allen, Lippe's Repertory, Bönninghausen's Therapeutics, Gross on Comparative Materia Medica, have been the books

most frequently referred to, and I have added such symptoms as have come to my notice in the treatment of these cases. The result has been a monograph which has been of great value to me. Several of my professional friends have known of and looked over the work, and that they and the profession at large may share it with me, I have been led to its publication.

The only suggestions I can offer as to its use are, that the physician obtain as many symptoms from the patient as possible, writing them down at the bedside; then taking the repertory, that he look up the symptoms, see what remedies are indicated by each of them, and select that drug which is most frequently mentioned. An illustration, taken from my note-book, may serve as a guide :

MISS A——— B———, May 12th, 1882.

Face yellow : *Arn.* Ars. Caps. Chin. *Eupat. perf.*
Ferr. *Ntr. m.* *Nux.* Petr. Rhus. Sep.

Total number of symptoms 24. The remedies most frequently mentioned, together with the number of times each occurs, may be tabulated as follows :

<i>Nux.</i>	23
<i>Eupat. perf.</i>	14
<i>Ntr. m.</i>	16
Chin.	10
Ars.	14

Nux cc. was given every two hours until after the time the next paroxysm was expected. No more chills to date. Before coming under my care they had been suppressed by quinine several times, but always came back again soon after the medicine was stopped. The face is now clear and the girl says she is perfectly cured.

The "key-note" system will often save looking up a case in this way.

As to potency, I have cured cases with the tinctures and with the hundred-thousandths, but were I asked what I considered the most successful and best adapted potencies, I should unhesitatingly reply: from the two hundredth upwards.

The best time to begin to administer the remedy is after the height of the paroxysm has been passed. This is particularly true of Ntr. m. The efficacy of the single dose I do not at all doubt, at least in many cases, but I have never conformed to the practice, having usually done as in the case referred to, though in some cases, I have continued the medicine for several days after the paroxysm has ceased.

With these suggestions the repertory is offered to the consideration of my professional brethren. It has saved me much time and given me many successes. I am well aware that many errors must have found their way into it, or rather into that part of it which originated with me. No one can be more anxious to correct them than myself, and I should be most happy to know of them, that I may do so.

WILLIAM A. ALLEN.

Flushing, New York, Nov. 2d, 1882.
